3.Product Feature And Application

316 Stainless Steel Bruce Anchor is a commonly used anchor and is often used on ships.

The Bruce Anchor has excellent grip due to its sharp flukes and efficient design. It is designed to penetrate deep into the seabed on impact and to generate high drag, preventing dragging or disengagement and providing a secure hold even in adverse conditions.

Bruce Anchor is a versatile anchor that is suitable for a variety of boats including sailboats, jet skis and small watercraft. It is commonly used for anchoring in coastal waters, ports and offshore locations. The 316 Stainless Steel Bruce Anchor is relatively easy to handle and deploy, bringing convenience to the boater. It can be quickly hoisted and stowed away when not in use.

When using a Bruce Anchor, it is critical to have the proper anchor stock (chain and rope combination) and to ensure the correct anchoring technique to maximize its effectiveness. Regular inspection, cleaning and maintenance of anchors are also important to maintain their life and performance.

4.Product Details

316 Stainless Steel Bruce Anchor are a popular choice for anchoring boats. Here are some of its main features:

Material: Made of high-quality stainless steel, which has excellent strength, corrosion resistance and durability. Stainless steel is ideal for marine

environments as 316 Stainless Steel Bruce Anchor can withstand salt water, harsh weather conditions and other corrosive elements.

Design: The Bruce Anchor is a plow anchor with an articulated double claw design. Shaped like a plow, the flukes can easily penetrate different types of seabed, including sand, mud and gravel. The design also provides good retention and reliable anchoring. It has a unique design consisting of concave flukes (or blades) that pivot on a hinge. This design helps the anchor fast and secure in different types of seabed including sand, mud and gravel.

Self-Adjusting: The 316 Stainless Steel Bruce Anchor has a self-adjusting feature, which means it can adjust itself according to the direction of the load as the vessel moves. This ensures that the anchor is firmly embedded in the seabed and prevents it from being dragged or coming loose.

Ease of use: They are relatively easy to store and deploy. Its compact design makes it easy to store on board, and it can be easily lowered or raised using a windlass or hand winch.

Versatility: Bruce Anchors are suitable for boats of all sizes. It is often used on pleasure boats, small yachts and commercial vessels. Its versatility makes it a popular choice for boaters of different types and sizes.

Cost-Effectiveness: The 316 stainless steel material used in Bruce Anchors provides a good balance between durability and cost-effectiveness. It has excellent corrosion resistance compared to other materials but is not too expensive.

Overall, the 316 Stainless Steel Bruce Anchor is a reliable and versatile choice for anchoring your boat. Its corrosion resistance, self-adjusting design and ease of use make it a popular choice among boaters around the world.

Loading & Shipment

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
